the **art** of **bike** storage℠

the leonardo

wall mount bike rack with tire tray

Works with any wheel size, large or small

Mounting Instructions:
READ CAREFULLY BEFORE USE !

⚠ **WARNING: Improper installation could result in personal injury including damage to your wall and your bike!**
Users should be aware of mounted racks to avoid potential accidental injuries.

⚠ **Mount on a wall capable of supporting 18kg/40lbs. Avoid mounting rack in a position where personal injury could result from protruding rack not being noticed and accidentally walked into.**

1) Identify where wooden stud lies within wall
2) Determine correct height to mount rack by
   a) holding bike upright with both tires touching the wall and
   b) marking the spot where the front tire touches the wall
   c) measure 12" above that spot to mark the top screw hole of rack

⚠ **Be sure to avoid drilling into any electrical, plumbing or other service fixtures hidden within wall.**

3) Drill pilot hole for wood screw (must be in wooden stud)
4) Use spirit level to determine vertical line for second screw
5) Screw in top hole but not fully home
6) Drill pilot hole for second screw along vertical line
7) Fully tighten both screws
8) Stand back and enjoy aesthetic appeal of Leonardo on your wall
   Hang bike in a pleasing manner.

⚠ **IMPORTANT: Be certain the rack is properly secure before hanging bikes. Do not exceed 18kg/40lbs. total load on rack.**
